

# MAVI FLORA

## QA Engineer

### Who am I?

I am **MA**rianela **VI**ctoria Flora. QA Engineer with experience in cross-platform software and game testing. With **+1 year experience** in the testing field. I upload **tech info** on [Twitter](#) if you wanna know more about me!

## Experience

### Junior Software Testing Engineer

**EPAM, June 2025 – Present**

- Performed performance, exploratory, functional, smoke and balance testing for the game Fortnite of EPIC Games
- **Multiplatform testing** across different devices (Android, iOS, PC, PlayStation 4 and 5, Xbox, Switch).
- Executed test cases, feedback loops, created bug reports and test cases.
- **Doubled the quality and speed of bug reports within 3 months** of the whole project by leading up a bug report review team
- Created and maintained up-to-date test documentation for the team in Confluence

### QA Tester

**Independent, January 2025 – June 2025**

- Worked on **QA projects independently** and in platforms such as UTest, GameTester, and TestIO
- Performed structured playtesting for different softwares, websites and games
- **Collaborated with cross-functional teams** (dev, art, design) to validate defects against release criteria.

### Robotics Software Developer Intern

**Innovacion y Desarrollo UNC, February 2025 - June 2025**

- Taken part of community-focused project aimed at providing accessible **assistive technology** robotic prosthesis
- Designed, coded and built electronic circuits using various components and C++ , including myoelectric sensors, actuators, and controllers, to integrate hardware and software functionalities.

### Robotics and Programming Workshop Intern

**Taller de Robotica y Programacion UNC, August 2024 - February 2025**

- Taught programming and robotics (C++ & Arduino) to 150+ students aged 8–14.

## Skills

- **Testing:** Functional testing, manual testing, Testing methodologies, Game testing, Bug reports, Regression testing, Integration testing, Test planning, Test case creation, Automated testing, Defect lifecycle, Bug tracking, Server deployment
- **Tools:** Jira , Agile Methodologies, Confluence, Github, Git
- **Automation:** Python, Selenium, C++, SQL, Playwright
